ADTC 2021: Programme online - register now!

the [program](#) [2] of the **European Nanoelectronics Applications Design and Technology Conference (ADTC)** is now complete and promises a very interesting event. The ADTC will take place on **June 15-16, 2021** and will be organised as a video conference. You could have a look on the program following this [link](#) [3]. The Registration is now open and free of charge and also mandatory to receive your personal Teams Link. **[to the registration](#)** [2]

The ADTC, the European Nanoelectronics Applications, Design & Technology Conference will focus on electronic components, electronic system design, design automation, and manufacturing topics related to micro- and nanoelectronics, which are critical to success for many European companies. It will highlight the exciting and promising results primarily from the CATRENE, PENTA, ECSEL/ENIAC, & H2020 projects and has a clear focus on deep technical discussions between the leading European experts in the addressed fields, independent from the research programs where the individual projects were started. The expected attendees will include project managers and leading experts in R&D projects in the fields of nanoelectronics and design technologies and their applications and the major research organizations in the European scientific community.

The edacentrum team is looking forward to meeting many members of the EDA community on this occasion, at least online.
