

BMBF invites to the digital conference "Trustworthy Electronics 2022" on 09-10.03.2022

[1]

In order to strengthen Germany's technological sovereignty, the Federal Government launched the flagship initiative "Trustworthy Electronics" in 2019. What has been achieved so far, how is Germany positioned in international comparison and how can standardisation and certification be advanced? These are central topics of the digital conference "Trustworthy Electronics 2022", to which the Federal Ministry of Education and Research invites you on 9-10 March 2022. The conference language will be German. Information and registration at www.elektronikforschung.de/vertrauenswuerdigkeit/konferenz [2]
