"eda10trum" - The edacentrum celebrates his 10th anniversary

[1]

Ten years ago, supported by the Federal Ministry for Education and Research the edacentrum has been founded by the German industry. In charge of the founders the registered association bundled, reinforced and supported German research and development in EDA. This was an important step taken to giving the EDA in society, politics and industry, the place that it deserves as a key to Microelectronics and thus the products of the future.

On **12/16/2012 from 1 pm on**, the edacentrum celebrates its tenth anniversary in Hanover together with senior representatives from government, industry and society. Information concerning the schedule (in German only) [2].

edacentrum | Schneiderberg 32 | 30167 Hannover | fon: +49 511 762-19699 | email: info@edacentrum [dot] deup
