## edaForum14: Short program and registration online

[1]

On **September 9-10, 2014** the **edaForum14** takes place in Berlin. Speakers from leading companies in important application areas as well as in the microelectronics industry will present concerning "Acceleration of innovation by microelectronics". A [short program](#) [2], the opportunity to [register](#) [3] and [further information](#) [4] are available online (but in German only). The edaForum14 and the immediately following fourth VDE / ZVEI Symposium Microelectronics want to increase awareness of the importance of microelectronics and design technology into the public consciousness. Thus, the since 2002 existing event series of edaForum continues, which brings together decision makers from the international system, semiconductor and EDA industry.
