## Welcome to the edaForum04 website!

What is the value of EDA? - You don't know? At the edaForum04 ultimate answers were discussed! You know the value of EDA? Great, then you will be perfect to help us, answering key questions like "EDA - simply cost or added value?", "How to meet the challenges of System Level and Physical Design?" or "How to double design productivity every year?".

At December 9-10, 2004 the third edaForum was held in Dresden. Please take a look round this website and see the highlights from this top rating event.

Read the [preface](#) <sup>[1]</sup> from Professor Erich Barke!

Remember the two days [program](#) <sup>[2]</sup> and our speakers, outstanding experts in their field!

Take a look at the [General Information](#) <sup>[3]</sup> to be reminded of the location.

And of course have a look at the [picture gallery](#) <sup>[4]</sup>, giving some visual impressions of the last year's event.

**To further improve the next years edaForum, the edacentrum would like to ask all attendees to make sure, that we got your [feedback formular](#) <sup>[5]</sup>. It can be send by fax to +49 (511) 762-19695**

If you like to be informed about next year's edaForum, just send us a request including your email address to [edaforum@edacentrum \[dot\] de](mailto:edaforum@edacentrum.de)
