

News from ECSEL and PENTA regarding new projects

[1]

A few days ago the Joint Undertaking ECSEL has published its Multi-Annual Strategic Plan 2016 (MASP) [2] and the corresponding Work Plan 2016 (WP) [3]. From the latter one the ECSEL-Calls for 2016 (release of both calls on March 15) will be derived. At the ECSEL Brokerage Event on January 26-27 in Strasbourg further information is expected. As in the last years edacentrum represents its members on this event and will collect information. Furthermore AENEAS is pleased to announce the first call by the new PENTA EUREKA cluster. Deadline for the submission of the project outline [4] is March 15. The edacentrum will support any initiation of your projects appropriate for these calls as it did during the preparation of the underlying strategies and roadmaps. Contact us.
