## Services for Members

The edacentrum offers the following services, financed by standard membership fees:

### Information and analyses

The edacentrum provides information and analyses, such as:

- Information material, such as a periodic newsletter and project reports.
- Extended range of information on the Web.
- Technology roadmaps and research strategy documents, including their creation.
- Standardisation support.

### Public relations

The edacentrum undertakes public relations, including:

- Public relations in the EDA sector for companies and research institutes.
- Public relations consulting.

### EDA cluster research

The edacentrum facilitates cluster research and development that offers:

- Networking for universities and research institutes to become research partners in an EDA cluster research project.
- Networking for companies to become industrial co-operation partners in an EDA cluster research project.
- Access to competence centers participating in EDA cluster research projects.

### Miscellaneous

The edacentrum offers a number of other services that facilitate co-operation within and between industry and academia, including:

- Access to the edacentrum network.
  - Networking and exchange of experience with other EDA users.
  - Representation at the EDA Consortium.
  - Representation in both national and international research initiatives and programs.
  - Discounts for edacentrum events such as edaWorkshop, edaForum, project workshops, co-operation workshops, and so on.
  - Representation in political bodies.
