Virtual edaWorkshop20 on October 7-8, 2020

edaWorkshop 20 ^[1]

Hannover - Due to the fact that travel restrictions (especially in the industry) will continue to exist for some time to come, we have decided to conduct the edaWorkshop20 planned for 7-8 October 2020 exclusively online. A survey of partners from industry and science has shown that this solution - despite all restrictions - offers the best benefits that can be safely realized at present. We are currently considering a few special highlights and will inform you about the detailed program and registration opportunities soon. Keep the two days free for your online participation now, it will be worth it! Current information about the edaWorkshop20 can be found [here](#) ^[2].
