The edaWorkshop, firstly organized in 2007 has its origin in the "Ekompass-Workshop" [53] , which has been established in 2002 in order to exchange solution approaches for key EDA challenges. The annually springtime event served as platform for presenting results which came out of EDA R&D projects, which are supported within the scope of the Ekompass sponsorship complex [54]of the Federal Ministry of Education and Research (BMBF [55]). As organizer, the edacentrum had decided to extend the successful concept of the event to the edaWorkshop.

* *Der sponsorship complex "Entwurfsplattformen komplexer angewandter Systeme und Schaltungen" (Ekompass) ihas been established by the Federal Ministry of Education and Research BMBF in order to stimulate EDA research activities dedicated to solve current and future electronic design problems. .*

An essential innovation of the edaWorkshop is the opening of the event to the whole German EDA community. A program committee consisting of leading EDA experts from industry and research guarantees a high quality of the accepted contributions, which are published in the edaWorkshop proceedings. The edaWorkshop is organized jointly by the edacentrum and BMBF, DLR and the GI/GMM/ITG RSS Steering Group for "Computer-aided Circuit and System Design".
