edaTrend - edacentrum's DAC and DATE trend reports

Conferences like the "Design Automation Conference" (DAC) and the "Design, Automation & Test in Europe" (DATE) offer a huge amount of sessions and events.

While planning your visit of such a conference, are you annoyed about the fact that you will not be able to visit all sessions which are important for you? Or do you want to have information on trends discussed during the conference even if you are unable to participate? Or do you like to have a comprehensive collection of reports on topics brought up during the conference?

In any of these cases the "edaTrend" reports are a very valuable publication and interesting offer for you!

**The edaTrend reports on DAC and DATE are available for the years 2007 and 2008.
To order the "edaTrend" reports please send us an email to [info@edacentrum \[dot\] de](mailto:info@edacentrum.de).**

edacentrum's "edaTrend" reports - published annually in 2007 and 2008- focus on essential industry, technology and business trends highlighted and discussed in conference keynote addresses, panel discussions, and some special sessions, as well as issues raised on the exhibition floor. They also contain source and reference information, and a short written evaluation with ratings for each session. These detailed reports, prepared by edacentrum's team of EDA experts, are an ideal record of the more significant discussions at the conference.

Your quality assurance

If you want to assure yourself about the quality of the "edaTrend" reports, we invite you have a look at the table of contents and one selected article from the current issue. Click the edaTrend cover and the related document will open in a new window:
